arguing that traditional test based evaluation has a negative effect on many
students this book describes new methods of assessing student performance

master s thesis from the year 2016 in the subject pedagogy the teacher
educational leadership language english abstract school inspection is one of the
most challenging aspects in education it represents an approach of
accountability in teaching and learning moreover school inspection provides
policy and decision makers with accurate information about the current state of
education in their respective institutions the main purpose of this study is to
examine and determine the impact of school inspection on teaching and learning
in dubai based private schools and to give some recommendations into how to
conduct effective school inspection that would positively influence teaching and
learning this research included 37 participants 2 inspectors 4 head teachers and
31 teachers from 4 private schools who follow different types of curricula from all
grades of performance according to inspection reports conducted in the 2014
2015 academic year the findings show that school inspection has a significant role
in school improvement especially in teaching and learning teachers acknowledge
the feedback that inspectors give to them however school inspection also has a

negative impact on teaching and learning for instance it forces some schools to show activities they have never done before moreover the school inspection reports and recommendations in some cases are superficial and are not related to the school context moreover they often do not show teachers how they can respond to criticism in the reality of their teaching practice nevertheless the relationship between inspectors and teachers is not that positive especially in some subjects such as arabic language and islamic studies this piece of research suggests some areas for the betterment in school inspection such as giving more importance for sse school self evaluations shortening the notice period visiting schools at different times throughout the academic year making such visits every three years as well as ensuring that school inspectors have a high degree in education and in the subject they inspect nevertheless it recommends establishing an independent school inspection system on the other hand this study suggests further research on the accountability of teaching and learning in dubai in specific subjects such as arabic and islamic studies because reality shows that the recent intervention and policy have not been as fruitful as expected

as a nation we spend more than 1 billion a year on federally mandated educational tests that 30 million students must take each year the country spends an additional 1 2 billion on test preparation materials designed to help students pass these tests while test mandates were put in place with good intentions increasingly educational leaders and policy makers are questioning

these test based reform efforts some question whether these programs are doing more harm than good others call for the development of more and better tests given the vast amount of resources our nation pours into testing is it time we pay closer attention to these testing programs is it time we hold the testing industry and policy makers accountable for the tests they make and use is it time we invest resources to develop new ways of testing our students the paradoxes of high stakes testing explores these and other questions as it helps parents teachers educational leaders and policy makers better understand the complexities of educational policies that use tests as a lever for improving the quality of education the book explores how testing is used to enable teachers and schools to be more effective and improve student learning why testing is so ingrained in the american psyche and why policy makers rely on testing policies to reform our educational system what we can learn from a long history of test based reform efforts that have occurred over centuries and across continents what effects testing has on teaching and learning in our schools when it is used to solve political social or economic problems most importantly the book describes several ways in which testing can be improved to provide more accurate and more useful measures of student learning many of these improvements capitalize on technology to provide teachers with more detailed diagnostic information about student learning and measure skills that some leaders argue are essential for the 21st century work force exploring what is within reach is critical because current testing policies are hindering these improvements finally given that testing is and will continue to be an integral part of our educational system the book concludes that like other sectors of our society educational testing must be more closely monitored to ensure that high quality tests are used to measure student achievement and to minimize the negative effects that testing has on students schools and our society given the opportunity our nation has to rethink and redesign its testing policies the paradoxes of high stakes testing presents a clear strategy to maximize the positive effects of educational testing
