studies in archaeology philosophy and archaeology presents the circumstances  
under which archeological hypotheses can be considered confirmed or  
disconfirmed this book discusses the role of analogy in archeological reasoning  
particularly in ascribing functions to archeological items organized into seven  
chapters this book begins with an overview of the relationship between

archeology and philosophy this text then examines the importance of laws for archeology and discusses some essential features of law statements other chapters consider the strong claims for the hypothetico deductive method of confirmation in various works by archeologists this book discusses as well the different uses of analogical reasoning in archeology and provides a discussion of the structure of analogical arguments criteria for evaluating them and their relations to the bayesian arguments for confirmation the final chapter deals with several issues related to the development of a theory of archeology this book is a valuable resource for archeologists and philosophers

this volume presents a collection of interdisciplinary collaborations between contemporary art heritage anthropological and archaeological practitioners departing from the proceedings of the sixth world archaeological congress s archaeologies of art theme and Ábhar agus meon exhibitions it includes papers by seminal figures as well as experimental work by those who are exploring the application of artistic methods and theory to the practice of archaeology art and archaeology collaborations conversations criticisms encourages the creative interplay of various approaches to art and archaeology so these new modes of expression can contribute to how we understand the world established topics such as cave art monumental architecture and land art will be discussed alongside contemporary video art performance art and relational arts practices here the parallel roles of artists as makers of new worlds and archaeologists as makers of pasts worlds are brought together to understand the influences of human creativity

in recent years the intersections between art history and archaeology have become the focus of critical analysis by both disciplines contemporary sculpture has played a key role in this dialogue the essays in this volume by art historians archaeologists and artists take the intersection between sculpture and archaeology as the prelude for analysis examining the metaphorical and conceptual role of archaeology as subject matter for sculptors and the significance of sculpture as a three dimensional medium for exploring historical attitudes to archaeology

world prehistory and archaeology provides an integrated discussion of world prehistory and archaeological methods presenting an up to date perspective on what we know about our human prehistory and how we come to know it a cornerstone of world prehistory and archaeology is the discussion of prehistory as an active process of discovery methodological issues are addressed throughout the text to engage readers archaeological methods are introduced following which the question of how we know the past is discussed this fifth edition involves readers in the current state of archaeological research revealing how archaeologists work and interpret what they find through the coverage of various new research author michael chazan shows that

archaeology is truly a global discipline in this edition there is a particular emphasis on the relevance of archaeology to contemporary society and to the major issues that face us today this edition will provide students with a necessary grounding in the fundamentals of archaeology before engaging them with the work that goes into understanding world prehistory they will be given the tools to place this knowledge in the context of the modern world acknowledging the relevance of archaeology to the concerns of today

based on a 2013 theoretical archaeology group tag conference session this book aims to merge the perspectives of artists and archaeologists on making art it explores the relationship between archaeology and art practice the interactions between materials and practitioners and the processes that result in the objects and images we call art

this dictionary provides those studying or working in archaeology with a complete reference to the field

this volume which has come about through a collaborative venture between dragos gheorghiu archaeologist and professional visual artist and theodor barth anthropologist aims at expanding the field of archaeological research with an anthropological understanding of practices that include artistic methods

reflects the diverse and anthropologically current debate flourishing in prehistoric hunter and gatherer research highlighting research in africa australia europe n america and the subarctic theoretical approaches range from the ecological to the sociological

the rise of public archaeology the popularity of tv archaeology and widespread stereotypes about the profession of archaeology have changed the way archaeologists relate to the public a socially meaningful archaeology needs to take seriously where the popular demand and the appeal of archaeology actually lie arguably non archaeologists know better what the subject is all about than most of its professionals do this is the first full length study of the meaning of archaeology in contemporary popular culture it is fully illustrated with cartoons by quentin drew in popular culture archaeology is associated with adventurous fieldwork criminological clue hunting great revelations and responsible care for threatened resources the emphasis is on doing archaeology rather than on its actual results cornelius holtorf argues in this provocative account of more than two years of research that archaeological companies and institutions are not in the business of understanding the past but of enhancing people s lives through adventures mysteries and revelations and by offering a chance to care archaeology may be an academic discipline but even more so it is a widely recognized positively valued and well underpinned brand as we can expect from cornelius holtorf the book contains not only its share of facts and analysis but

also more than a few controversial arguments about the present and future roles of archaeology in society it is unmissable for professional archaeologists working in the heritage sector as well as for students of archaeology anthropology heritage and museum studies cultural studies science studies and related disciplines dr cornelius holtorf is assistant professor in archaeology at the university of lund in sweden quentin drew is a cartoonist as well as lecturer in archaeology and director of foundation studies at the university of wales lampeter

field methods in archaeology has been the leading source for instructors and students in archaeology courses and field schools for 60 years since it was first authored in 1949 by the legendary robert heizer left coast has arranged to put the most recent seventh edition back into print after a brief hiatus making this classic textbook again available to the next generation of archaeology students this comprehensive guide provides an authoritative overview of the variety of methods used in field archaeology from research design to survey and excavation strategies to conservation of artifacts and record keeping authored by three leading archaeologists with specialized contributions by several other experts this volume deals with current issues such as cultural resource management relations with indigenous peoples and database management as well as standard methods of archaeological data collection and analysis

this major study reflects the increasing significance of careful model formation and testing in those academic subjects that are struggling from intuitive and aesthetic obscurantism toward a more disciplined and integrated approach to their fields of study the twenty six original contributions represent the carefully selected work of progressive archaeologists around the world covering the use of models on archaeological material of all kinds and from all periods from palaeolithic to medieval their common theme is archaeological generalisation by means of explicit model building testing modification and reapplication the contributors seek to show that it is the use of certain models in particular ways that defines archaeology as the practice of one discipline with a set of general tenets that are as applicable in peru as in persia australia as alaska sweden as scotland on material from the second millennium b c to the second millennium a d they assert that careful model formulation within archaeology and the cautious exchange and testing of models within and beyond the discipline provides the only route to the formation of the common internationally valid body of theory which defines a vigorous and coherent discipline and distinguishes it from being a collection of merely regionally applicable special cases

this volume explores the relationship between archaeology and contemporary society especially as it concerns local communities living day to day alongside archaeological heritage the contributors come from a range of disciplines and

offer inspiring views emerging from the marriage of archaeology with a number of other fields such as economics social anthropology ethnography public policy oral history and tourism studies to form the discipline of public archaeology there is growing interest in investigating the meanings of archaeology assets and archaeological landscapes and this volume targets these issues with case studies from greece italy turkey and elsewhere the book addresses both general readers and scholars with an interest in how archaeological assets affected by people s understanding of landscape and identity it also touches upon the roles played in these interactions by public policy international conventions market economies and theoretical frameworks of public archaeology

quantitative analysis in archaeology introduces the application of quantitative methods in archaeology it outlines conceptual and statistical principles illustrates their application and provides problem sets for practice discusses both methodological frameworks and quantitative methods of archaeological analysis presents statistical material in a clear and straightforward manner ideal for students and professionals in the field includes illustrative problem sets and practice exercises in each chapter that reinforce practical application of quantitative analysis

this book presents cutting edge multidisciplinary work on the characterization of ancient materials the technologies of selection production and usage by which materials are transformed into objects and artifacts the science underlying their deterioration preservation and conservation and sociocultural interpretation derived from an empirical methodology of observation measurement and experimentation of particular interest are contributions which explore the interface and overlap among traditional materials science the history of technology and the archaeological and conservation sciences or that investigate new methods and applications of materials science in art and archaeology topics include analytical chemistry and spectroscopy ancient and historical metallurgy natural and artificial glass characterization sources and production of ceramics organic materials technologies architectural conservation and materials characterization conservation of archaeological and historical materials and other studies of ceramics and metals
